Gameplay Systems

PROFILE

Game AI and gameplay systems programmer with a strong passion for artificial intelligence, gameplay architecture, and real-time systems development.

Experienced in Unreal Engine 5 and modern C++, with a focus on clean architecture, performance optimisation, and scalable gameplay systems.

Particularly interested in AI programming, squad behaviour, decision-making systems, and game engine architecture.

EXPERIENCE

● Gameplay Programming Intern FEB 2026 – JUN 2026

Behaviour Interactive Rotterdam

- Developed gameplay systems in Unreal Engine.
- Worked within a multidisciplinary development environment.
- Contributed to an unannounced Tencent project.
- Gained experience working with production pipelines and large-scale projects.
